2 Service Descriptions and Rates (cont'd)2.3 Business Local Exchange Service (Cont'd)2.3.1 AT&T Calling Area Services (Cont'd)Measured Rate Service

The local usage charges are based upon four measured elements, i.e., the total number of outgoing local messages, the distance and the duration of each local message and the time of day each local message is originated, subject to the following:

- a. Distance - The charges for local messages vary based on the airline distance (i.e., rate mileage) between the rate centers of the central offices serving the calling and called stations, determined in the same manner as message toll rate distances.
- b. Duration
  - (1) A charge applies for the initial minute, or fraction thereof; and for each additional minute, or fraction thereof.
  - (2) A local message is considered as starting at the time telephone communication is established between the calling station and the called telephone number.
  - (3) Chargeable time ends when the calling station "hangs up" thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network, connection is released by the automatic timing equipment in the telephone network.
  - (4) Chargeable time does not include time lost because of faults or defects in the service.
