ACCESS SERVICE TARIFF

INTRASTATE ACCESS

(A) General Regulations

The Chillicothe Telephone Company offers intrastate equal access for both interLATA and intraLATA message tolls. InterLATA equal access was introduced in 1989 and effective August 1, 1997 equal access for intraLATA will be available.

1. Our subscribers will be notified within 60 days of implementation that they may choose a carrier other than their local telephone company for their intraLATA message traffic.
2. Subscribers have the option of remaining with their local telephone company for their intraLATA message traffic.
3. Subscribers can have a different carrier for their interLATA and intraLATA message traffic.
4. The rates and regulations in paragraphs B. & C. of this tariff that apply to intrastate interLATA also apply to intraLATA.
5. Beginning with implementation and continuing for 90 days from the implementation date or 90 days from mailing of customer notification, whichever is longer, customers requesting to change their intraLATA carrier will be changed free.
6. After the 90 day time period for free changes of an intraLATA carrier (detailed in A.5 above) has expired, a charge of \$5.50 will apply to change an intraLATA carrier. In the event that the subscriber changes their intraLATA carrier simultaneously with their interstate carrier, one-half of the intraLATA PIC Change Charge will be waived. (C)
7. New local service customers will be asked to select an interLATA and intraLATA toll carrier at the time they place an order for local exchange service with the Telephone Company. (C)
8. If a new customer is unable to make a selection, a random list of available carriers will be read to the customer. The customer will have 90 days to make a selection free of charge. During the 90 days, the customer will not have an intraLATA toll carrier so they must dial a carrier access code (10XXX/101XXXX) to route each intraLATA call.
9. (D)

Issued: February 1, 2006

Effective: February 1, 2006

Issued by William McKell, Chief Executive Officer

Case No.06-153-TP-ZTA

TARIFF P.U.C.O. NO. 5
ACCESS SERVICE TARIFFSection 1. Intrastate Access (Cont'd)(B) Toll VoIP-PSTN Traffic

(N)

The term "Toll VoIP -PSTN Traffic" denotes a Customer's interexchange voice traffic exchanged with the Company in Time Division Multiplexing format over PSTN facilities, which originates and/or terminates in Internet Protocol (IP) format. "Toll VoIP-PSTN Traffic" originates and/or terminates in IP format when it originates from and/or terminates to an end user customer of a service that requires IP-compatible customer premises equipment.

(C) Identification and Rating of Toll VoIP-PSTN Traffic

(1). Scope

- a. This section governs the identification of Toll VoIP-PSTN Traffic that is required to be compensated at interstate access rates, unless the parties have agreed otherwise, by the Federal Communications Commission in its Report and Order in WC Docket Nos. 10-90, etc., FCC Release No. 11-161, November 18, 2011 ("FCC Order").
- b. This section establishes the method of separating Toll VoIP-PSTN Traffic from the customer's traditional intrastate access traffic, so that Toll VoIP-PSTN Traffic can be billed in accordance with the FCC Order.
- c. This section of the tariff does not preclude customers from negotiating different rates, terms and conditions governing compensation for Toll VoIP-PSTN traffic.
- d. This tariff does not supersede rates, terms and conditions governing compensation for Toll VoIP-PSTN traffic in existing interconnection agreements. Rates, terms and conditions governing compensation for Toll VoIP-PSTN traffic in this tariff apply prospectively.

(2). Rates

Toll VoIP-PSTN Traffic identified in accordance with this tariff section will be billed at rates equal to the Telephone Company's applicable tariffed interstate switched access rate as specified in the National Exchange Carrier Association Tariff F.C.C. No.5, or the interstate switched access tariff in which the Company concurs.

TARIFF P.U.C.O. NO. 5
ACCESS SERVICE TARIFF

Section 1. Intrastate Access (Cont'd)

(C) Identification and Rating of Toll VoIP-PSTN Traffic (cont'd)

(3). Calculation and Application of Percent-VoIP-Usage Factor

- a. The Company will determine the number of Toll VoIP-PSTN Traffic minutes of use ("MOU") to which interstate rates will be applied under 2.2 preceding, by applying the Percent VoIP Usage ("PVU") factor to the total intrastate access MOU originated by the Customer's end user in IP format and delivered to the Company end user and terminated by the Company in IP format.
- b. The Company will calculate and make available to the Customer a Percent VoIP Usage ("PVU-T") factor representing the whole number percentage of The Company's total intrastate access MOU that the customer exchanges with The Company in the state that is terminated in IP format and that would be Billed by the Company as intrastate access MOU.
- c. The customer will calculate and furnish to the Company a Percent VoIP Usage-Customer ("PVU-C") factor representing the whole number percentage of the customer's total intrastate access MOU that the customer exchanges with the Company in the state that is sent to the Company and which originated in IP format and that would be billed by the Company as intrastate access MOU.
- d. The Company will use the PVU-C and PVU-T factors to calculate a PVU factor that represents the percentage of total intrastate access MOU exchanged between the Company and the customer that is originated in IP format by the customer and/or terminated by the Company in IP format.

TARIFF P.U.C.O. NO. 5
ACCESS SERVICE TARIFFSection 1. Intrastate Access (Cont'd)(C) Identification and Rating of Toll VoIP-PSTN Traffic (cont'd)(3). Calculation and Application of Percent-VoIP-Usage Factor (cont'd)

- e. The Company will apply the PVU factors to the intrastate access MOU exchanged with the customer to determine the number of Toll VoIP-PSTN MOU.

Example 1: The PVU calculation is applied to the customer's intrastate MOU.

$$PVU = PVU-C + (PVU-T \times (I - PVU-C))$$

The customer reported that their PVU-C as 15%. The Company's PVU-T is 6%. This results in the following:

$$PVU = 15\% \text{ plus } (6\% \text{ times } (1 - 15\%)) = 20\%$$

This means that 20% of the Customer's terminating Intrastate MOU will be rated at Interstate rates.

- f. The customer shall not modify their reported PIU factor to account for Toll VoIP-PSTN traffic.
- g. The customer provided PVU-C shall be based on information such as the number of the customer's retail VoIP subscriptions in the state (e.g. as reported on FCC Form 477), traffic studies, actual call detail or other relevant and verifiable information which will be provided to Company upon request.
- h. The customer shall retain the call detail, work papers and information used to develop the PVU-C factors for a minimum of one year.
- i. If the customer does not furnish the Company with a PVU-C factor, the Company will utilize a PVU-C of 0% and the PVU will be equal to the Telephone Company's PVU-T.

(4). Initial Implementation of PVU Factors

- a. If the PVU factor is not available and/or cannot be implemented in the Company's billing systems by December 29, 2011, once the factor is available and can be implemented, the Company will adjust the customer's bills to reflect the PVU factors retroactively to January 1, 2012, if the PVU-C factor is provided by the customer to the Company within 30-days from the effective date of this tariff.
- b. The Company shall provide credits based on the reported PVU-C factors on a quarterly basis until such time as the billing system modifications can be implemented.

(5). PVU Factor Updates

- a. The customer may update the PVU-C factor quarterly using the method set forth in (C)(3).c preceding. If the customer chooses to submit such updates, it shall forward to the Company, no later than 15 days after the first of January, April, July and/or October of each year, revised PVU-C factors based on data for the prior three months, ending the last day of December, March, June and September, respectively. The Company may also update and make available to the customer, its PVU-T factor in the same manner set forth above, using the method set forth in (C)(3).b.
- b. The revised PVU-C factors will serve as the basis for future billing and will be effective on the next bill date, and shall serve as the basis for subsequent monthly billing until superseded by new PVU-C factors.
- c. No prorating or back-billing will be done based on the updated PVU-C factors.
- d. If the customer does not supply the revised reports, the Company will assume the PVU-C percentages to be the same as those provided in the last quarterly report. For those cases in which a quarterly report or an initial PVU-C has never been received from the customer, the Company will assume the PVU-C percentages to be 0% as set forth in (C)(3).i above.

(N)

(6) PVU Factor Verification

- a. Not more than twice in any year, the Company or the customer (Requesting Party) may request from the other party an overview of the process used to determine the PVU factors, the call detail records, description of the method for determining how the end user originates or terminates calls in IP format, and other information used to determine the PVU factors furnished to the other party in order to validate the PVU factors supplied. The other party shall comply, and shall reasonably supply the requested data and information within 15 days of the Requesting Party's request; and the Requesting Party shall complete the re-verification within 15 days of receipt.
- b. The Company may dispute the customer's PVU-C factor and the customer may dispute the Company's PVU-T factor based upon:
 1. A review of the requested data and information provided by the customer.
 2. A reasonable review of other market information, FCC reports on VoIP lines, such as FCC Form 477 or state level results based on FCC Local Competition Report or other relevant data.
 3. A change in the reported PVU-C or PVU-T factor by more than five percentage points from the preceding quarter.
- c. If after review of the data and information, the customer and the Company establish revised PVU factors, the customer and the Company will begin using those revised PVU factors with the next bill period.
- d. If the dispute is unresolved, the Requesting Party may initiate an audit at its own expense. The Requesting Party shall limit audits of the other party's PVU factor to no more than twice per year. The other party (party receiving the request) may request that the audit be conducted by an independent auditor. In such cases, the associated auditing expenses will be paid by the other party.

(N)

Case No. 12-1865-TP-ATA

ACCESS SERVICE TARIFFSection 1. Intrastate Access (Cont'd)(C) Identification and Rating of Toll VoIP-PSTN Traffic (cont'd)

(N)

(6) PVU Factor Verification (cont'd)

1. In the event that the customer fails to provide adequate records to enable the Requesting Party or an independent auditor to conduct an audit verifying the other party's PVU factors, the Requesting Party will bill the usage for all contested periods using the most recent undisputed PVU factors reported by the other party. These PVU factors will remain in effect until the audit can be completed.
2. During the audit, the undisputed PVU factors from the previous reporting period will be used by the Requesting Party.
3. When a PVU(s) audit is conducted by the Requesting Party or an independent auditor under contract to the Requesting Party, the audit results will be furnished to the other party by Certified U.S. Mail. When a PVU(s) audit is conducted by an independent auditor selected by the other party, the audit results will be furnished to the Requesting Party by Certified U.S. Mail. The Requesting Party will adjust the other party's PVU(s) based upon the audit results. The PVU(s) resulting from the audit shall be applied to the other party's usage for the quarter the audit is completed and the usage for the quarter prior to the completion of the audit. After that time, the other party may report revised PVU(s) pursuant to (C)(3), above. If the revised PVU(s) submitted by the other party represents a deviation of 5 percentage points or more from the audited PVU(s), and that deviation is not due to identifiable reasons, the provisions in (b)(c) and (d), above, may be applied.
4. If the audit supports the other party's PVU factors, the usage for the contested periods will be adjusted to reflect the other party's audited PVU factors and appropriate credits will be applied.
5. If, as a result of an audit conducted by an independent auditor, the other party is found to have over-stated its PVU factors by 20 percentage points or more, the Requesting Party shall require reimbursement from the other party for the cost of the audit. Such bills shall be due and paid in immediately available funds within 30 days from receipt and shall carry a late payment penalty as set forth in the Requesting Party's Intrastate Tariff if not paid within the 30 days.

TARIFF P.U.C.O. NO. 5
ACCESS SERVICE TARIFF

Section 1. Intrastate Access (Cont'd)

(D) Access Rates (T)

The rates, charges, and conditions for the provision of intrastate Carrier Access Service are as specified in The Chillicothe Telephone Company Interstate Access Services, Tariff F.C.C. NO. 1, as it now exists, and as it may be revised, added to or supplement. Section 4, End User Services, is not effective in Ohio.

Carrier Common Line Access Service terms and conditions appear in Section 2, Sheets 1-14 herein, whereas the rates have been moved to Section 2, Sheet 14 herein.

On November 18, 2011, the Federal Communications Commission (FCC) released its Report and Order and Further Notice of Proposed Rulemaking (Report and Order) in WC Docket No. 07-135 et al.. In the Matter of Establishing just and Reasonable Rates for Local Exchange Carriers. In its Report and Order, the FCC adopted a transitional intercarrier compensation restructuring framework for both intrastate and interstate telecommunications traffic exchanged with a local exchange carrier, which will ultimately result in bill and keep.

During the first phase of the its intercarrier compensation restructuring, the intrastate terminating switched end office and transport rates, originating and dedicated transport rates, and reciprocal compensation rates that are above the carrier's interstate access rates, the respective intrastate rates must be reduced by 50 percent of the differential between the rate and carrier's interstate access rates by July 1, 2012.

During the second phase, the intrastate terminating switched end office and transport rates, originating and dedicated transport rates, and reciprocal compensation rates that are above the carrier's interstate access rates, will be set equal to the carrier's interstate access rates by July 1, 2013.

The above mentioned end office rates include carrier common line access service. These rates will be adjusted accordingly in Section 2, Sheet 14 herein.

For end User Service the Public Utilities Commission of Ohio ordered that the service not be implemented.

(E) Billing and Collection Rates (T)

Interexchange billing and collection services, except for recording services, are deregulated. Recording services, other than billing and address services, while subject to regulation by the PUCO, are de-tariffed

Section 1. Intrastate Access (Cont'd)(E) Billing and Collection Rates (Cont'd) (T)

Upon conversion of an end-office to equal access, billing name and address information for non-presubscription traffic shall be provided to interexchange carriers pursuant to rates, terms and conditions contained in paragraphs C.3 and C.4.

(1) General Descriptions

Billing name and address service (BNA) is the provision of account detail for use by the customer in billing its non-presubscribed or "10XXX"/"101XXXX" traffic.

(2) General Regulations

- a. Upon acceptance by the Telephone Company of a request for DNA service, the Telephone Company will furnish account detail for requested accounts. Account detail consists of the end user name, billing address and billing parameters other than message detail and/or service and equipment detail.
- b. Only current information which resides in the data base will be provided.
- c. The Telephone Company will specify the location where requests are to be received and the format in which the requests are to be made.
- d. The customer shall make every effort to make sure that BNA output is provided only to authorized personnel. The customer shall agree, in writing to the Telephone Company that the customer will not provide the BNA output to third parties for use by those third parties except for work for the customer which is under the complete control of the customer.

(3) Rate Regulations

- a. The number and type of records for which charges apply will be accumulated by the Telephone Company and the Telephone Company will bill the customer in accordance with these accumulations. A record is a logical grouping of information.

INTRASTATE CARRIER COMMON LINE ACCESS SERVICE
REFERENCE TARIFF

The Telephone Company will provide Carrier Common Line Access Service (Carrier Common Line Access) to interexchange service providers ("IXCs") in conjunction with Switched Access Service provided in Section 6. of the National Exchange Carrier Association (NECA) Tariff F.C.C. No. 5 or the appropriate Switched Access Service section of other Access Service tariffs in which the Telephone Company participates.

(T)

1. General Description

Carrier Common Line Access provides for the use of end users' Telephone Company-provided common lines by IXCs for access to such end users to furnish intrastate communications.

Premium Access is (1) Switched Access Service provided to customers under this tariff which furnish intrastate MTS/WATS, and (2) Switched Access Service in an end office converted to equal access.

(T)

INTRASTATE CARRIER COMMON LINE ACCESS SERVICE
REFERENCE TARIFF

2. Limitations

2.1 Exclusions

Neither a telephone number nor detail billing is provided with Carrier Common Line Access. Additionally, directory listings and intercept arrangements are not included in the rates and charges for Carrier Common Line Access.

2.2 Access Groups

All line side connections provided in the same access group will be limited to the same features and operating characteristics.

All trunk side connections provided in the same access group will be limited to the same features and operating characteristics.

2.3 WATS Access Lines

Where Switched Access Services are connected with Special Access Services at Telephone Company Designated WATS Serving Offices for the provision of WATS or WATS-type Services, Switched Access Service minutes which are carried on that end of the service (i.e., originating minutes for outward WATS and WATS-type services and terminating minutes for inward WATS and WATS-type services) shall not be assessed Carrier Common Line Access per minute charges.

(T)

(T)

INTRASTATE CARRIER COMMON LINE ACCESS SERVICE
REFERENCE TARIFF

3. Undertaking of the Telephone Company

(T)

Where the IXC is provided Switched Access Service for intrastate communications under other sections of this or other Access Service tariffs, the Telephone Company will provide the use of Telephone Company common lines by an IXC for access to end users at rates and charges as set forth in the Telephone Company's Intrastate Access Service Tariff.

4. Obligations of the IXC

4.1 Switched Access Service Requirement

The Switched Access Service associated with Carrier Common Line Access shall be ordered by the IXC under applicable sections of NECA Tariff F.C.C. No. 5.

4.2 Supervision

The IXC facilities at the premises of the ordering IXC shall provide the necessary on-hook and off-hook supervision.

(T)

INTRASTATE CARRIER COMMON LINE ACCESS SERVICE
REFERENCE TARIFF

5. Determination of Usage Subject to Carrier Common Line Access Charges

(T)

Except as set forth herein, all Switched Access Service provided to the IXC will be subject to Carrier Common Line Access charges.

5.1 Cases Involving Usage Recording By the IXC

Where Feature Group C end office switching is provided without Telephone Company recording and the IXC records minutes of use used to determine Carrier Common Line Access charges (i.e., Feature Group C operator and calls such as pay telephone sent-paid, operator-DDD, operator-person, collect, credit-card, third number and/or other like calls), the IXC shall furnish such minutes of use detail to the Telephone Company in a timely manner. If the IXC does not furnish the data, the IXC shall identify all Switched Access Services that could carry such calls in order for the Telephone Company to accumulate the minutes of use through the use of special Telephone Company measuring and recording equipment.

5.2 Local Exchange Access and Enhanced Services Exemption

When access to the local exchange is required to provide an IXC service (e.g., MTS/WATS-type, telex, Data, etc.) that uses a resold Special Access service, Switched Access Service Rates and Regulations, as set forth in Section 6. of NECA Tariff F.C.C. No. 5 will apply, except when such access to the local exchange is required for the provision of an enhanced service.

(T)

INTRASTATE CARRIER COMMON LINE ACCESS SERVICE
REFERENCE TARIFF

6. Resold Services

(T)

6.1 Scope

Where the IXC is reselling MTS and/or MTS-type service(s) on which the Carrier Common Line and Switched Access charges have been assessed, the IXC may, at the option of the IXC, obtain Feature Group A, Feature Group B or Feature Group D Switched Access Service under Section 6. of NECA Tariff F.C.C. No. 5 for originating and/or terminating access in the local exchange. Such access group arrangements whether single lines or trunks or multiline hunt groups or trunk groups will have Carrier Common Line Access charges applied as set forth in the Telephone Company's Intrastate Access Service Tariff in accordance with the resale rate regulations set forth in 6.4 following. For purposes of administering this provision:

Resold intrastate terminating MTS and MTS-type service(s) shall include collect calls, third number calls and credit card calls where the reseller pays the underlying carrier's service charges.

Resold intrastate originating MTS and MTS-type service(s) shall not include collect, third number, or credit card calls.

(T)

INTRASTATE CARRIER COMMON LINE ACCESS SERVICE
REFERENCE TARIFF6. Resold Services (Cont'd)

(T)

6.2 IXC Obligations Concerning the Resale of MTS and MTS-type Services

When the IXC is reselling MTS and/or MTS-type service as set forth in 6.1 preceding, the IXC will be charged Carrier Common Line Access charges in accordance with the resale rate regulations as set forth in 6.4 following if the IXC furnishes documentation of the MTS usage and/or the MTS-type usage. Such documentation supplied by the IXC shall be supplied each month and shall identify the involved resold MTS and/or MTS-type services.

The monthly period used to determine the minutes of use for resold MTS and/or MTS-type service(s) shall be the most recent monthly period for which the IXC has received a bill for such resold service(s). This information shall be delivered to the Telephone Company, at a location specified by the Telephone Company, no later than 15 days after the bill date shown on the resold MTS and/or MTS-type service bill. If the required information is not received by the Telephone Company, the previously reported information, as described preceding, will be used for the next two months. For any subsequent month, no allocation or credit will be made until the required documentation is delivered to the Telephone Company by the IXC.

6.3 Resale Documentation Provided By the IXC

When the IXC utilizes Switched Access Service as set forth in 6.2 preceding, the Telephone Company may request a certified copy of the IXC's resold MTS or MTS-type usage billing. Requests for billing will relate back no more than 12 months prior to the current billing period.

(T)

INTRASTATE CARRIER COMMON LINE ACCESS SERVICE
REFERENCE TARIFF6. Resold Services (Cont'd)6.4 Rate Regulations Concerning the Resale of MTS and MTS-type Services

When the IXC is provided an access group to be used in conjunction with the resale of MTS and/or MTS-type services as set forth in 6.1 preceding, subject to the limitations as set forth in 6.2 preceding, and the billing entity receives the usage information required as set forth in 6.2 preceding, to calculate the adjustment of Carrier Common Line Access charges, the IXC will be billed as set forth in (C) below.

(A) Apportionment and Adjustment of Resold Minutes of Use

When the IXC is provided with more than one access group in a LATA in association with the resale of MTS and/or MTS-type services, the resold minutes of use will be apportioned as follows:

(1) Originating Services

The Telephone Company will apportion the resold originating MTS and/or MTS-type services and originating minutes of use for which the resale credit adjustment applies, among the access groups. Such apportionment will be based on the relationship of the originating usage for each access group to the total originating usage for all access groups in the LATA. For purposes of administering this provision:

Resold originating MTS and/or MTS-type services minutes shall be only those attributable to intrastate originating MTS and/or MTS-type minutes and shall not include collect, third number, or credit card calls.

The resale credit adjustment shall apply for resold originating MTS and MTS-type services and minutes of use, provided Carrier Common Line and Switched Access Charges have been assessed on such services.

(T)

6.4 Rate Regulations Concerning the Resale of MTS and MTS-type Services (Cont'd)(A) Apportionment and Adjustment of Resold Minutes of Use (Cont'd)(2) Terminating Services

The Telephone Company will apportion the resold terminating MTS and/or MTS-type services and terminating minutes of use for which the resale credit adjustment applies, among the access groups. Such apportionment will be based on the relationship of the terminating usage for each access group to the total terminating usage for all access groups in the LATA. For purposes of administering this provision:

Resold terminating MTS and/or MTS-type services minutes shall be only those attributable to intrastate terminating MTS/MTS-type (i.e., collect calls, third number calls, and credit card calls).

The resale credit adjustment shall apply for resold terminating MTS and MTS-type services and minutes of use, provided Carrier Common Line and Switched Access Charges have been assessed on such services.

(B) Direct and Indirect Connections

Each of the access group arrangements used by the IXC in association with the resold MTS and/or MTS-type services must be connected either directly or indirectly to the IXC designated premises at which the resold MTS and/or MTS-type services are terminated. Direct connections are those arrangements where the access groups and resold MTS and/or MTS-type services are terminated at the same IXC designated premises.

Indirect originating connections are those arrangements where the access groups and the resold originating MTS and/or MTS-type services are physically located at different IXC designated premises in the same exchange. Such different IXC designated premises are connected by facilities that permit a call to flow from access groups to resold MTS and/or MTS-type services.

Indirect terminating connections are those arrangements where the access groups and resold terminating MTS and/or MTS-type services are physically located at different IXC designated premises in the same exchange. Such different IXC designated premises are connected by facilities that permit a call to flow from resold terminating MTS and/or MTS-type services to access groups.

INTRASTATE CARRIER COMMON LINE ACCESS SERVICE
REFERENCE TARIFF6. Resold Services (Cont'd)6.4 Rate Regulations Concerning the Resale of MTS and MTS-type Services (Cont'd)(C) Rates

The Premium Access Charge per minute as set forth in the Telephone Company's Intrastate Access Service Tariff will apply. The minutes billed Carrier Common Line Access Service charges will be the adjusted originating intrastate access minutes and the adjusted terminating intrastate access minutes.

The adjusted originating access minutes will be the originating intrastate access minutes less the reported resold originating MTS and/or MTS-type service minutes of use as set forth in (A)(1) preceding; but not less than zero. The adjusted terminating access minutes will be the terminating intrastate access minutes less the reported resold terminating MTS and/or MTS-type service minutes of use as set forth in (A)(2) preceding; but not less than zero.

(D) When the Adjustment Will Be Applied to IXC Bills

The adjustment as set forth in (C) preceding will be made to the involved IXC account no later than either the next bill date, or the one subsequent to that, depending on when the usage report is obtained.

(E) Conversion of Billed Usage to Minutes

When the MTS and/or MTS-type usage is shown in hours, the number of hours shall be multiplied by 60 to develop the associated MTS and/or MTS-type minutes of use. If the MTS and/or MTS-type usage is shown in a unit that does not show hours or minutes, the IXC shall provide a factor to convert the shown units to minutes.

(F) Percent Intrastate Use (PIU)

The adjustment as set forth in (C) preceding will be made to the involved IXC account after making the adjustments to the customer account as set forth in 7.4 following (PIU).

7. Rate Regulations

(T)

7.1 Billing of Charges

Carrier Common Line charges will be billed to each Switched Access Service provided under this tariff and the Telephone Company's Intrastate Access Service Tariff.

7.2 Measuring and Recording of Call Detail

When access minutes are used to determine Carrier Common Line charges, they will be accumulated using call detail recorded by Telephone Company equipment except as set forth in 7.3 following (Unmeasured FGA and B Usage) and Feature Group C operator and automated operator services systems call detail such as pay telephone sent-paid, operator-DDD, operator-person, collect, credit-card, third number and/or other like calls recorded by the customer. The Telephone Company measuring and recording equipment, except as set forth in 7.3 following (Unmeasured FGA and B Usage), will be associated with end office or local tandem switching equipment and will record each originating and terminating access minute where answer supervision is received. The accumulated access minutes will be summed on a line by line basis, by line group or by end office, whichever type of account is used by the Telephone Company, for each IXC and then rounded to the nearest minute.

7.3 Unmeasured Feature Group A and B Usage

When Carrier Common Line Access is provided in association with Feature Group A or Feature Group B Switched Access Service in Telephone Company offices that are not equipped for measurement capabilities, assumed average intrastate access minutes will be used to determine Carrier Common Line Access charges. These assumed access minutes are as set forth in the exchange carriers' access tariffs.

7.4 Percent Intrastate Use (PIU)

When the IXC reports interstate and intrastate use of in-service Switched Access Service, Carrier Common Line charges will be billed to intrastate Switched Access Service access minutes based on the data reported by the IXC as set forth in Section 2.3.11 of NECA Tariff F.C.C. No. 5 (Jurisdictional Reports), except where the Telephone Company is billing according to actuals by jurisdiction. Intrastate Switched Access Service access minutes will, when necessary, be used to determine Carrier Common Line Charges as set forth in 7.5 following.

7.5 Determination of Premium Charges

After the adjustments as set forth in 7.4 preceding have been applied, when necessary, to Switched Access Service access minutes, charges for the involved IXC account will be determined as follows:

- (A) Access minutes for all premium rated Switched Access Service subject to Carrier Common Line charges will be multiplied by the Premium Access per minute rate as set forth in the Telephone Company's Intrastate Access Service Tariff.
- (B) Access minutes for all FGB Access Services with an Abbreviated Dialing Arrangement (ADA) subject to Carrier Common Line Charges will be multiplied by the Premium Access per minute rate as set forth in the Telephone Company's Intrastate Access Service Tariff.
- (C) Carrier Common Line charges shall not be reduced as set forth in 6.1 preceding unless Switched Access Charges, as set forth in Section 6. of NECA Tariff F.C.C. No. 5, are applied to the IXC's Switched Access Services.

INTRASTATE CARRIER COMMON LINE ACCESS SERVICE
REFERENCE TARIFF7. Rate Regulations (Cont'd)7.5 Determination of Premium Charges (Cont'd)

(D) Terminating Premium Access per minute charge(s) apply to:

- all terminating access minutes of use;
- less those terminating access minutes of use associated with Wireless Switching Centers (WSCs);
- all originating access minutes of use associated with FGA Access Services where the off-hook supervisory signaling is forwarded by the IXC's equipment when the called party answers;
- all originating access minutes of use associated with calls placed to 700, 800 series and 900 numbers, less those originating access minutes of use associated with calls placed to 700, 800 series and 900 numbers for which the IXC furnishes for each month a report of either the number of calls or minutes or a report of the percent of calls or minutes that terminate in a Switched Access Service that is assessed Carrier Common Line charges.

When the IXC makes this report available to the Telephone Company in advance of billing, these minutes of use will be charged on the current bill as originating minutes of use as set forth in (E) following. If a billing dispute arises concerning the IXC provided report, the Telephone Company will request the IXC to provide the data the IXC used to develop the report. The Telephone Company will not request such data more than once a year. The IXC shall supply the data within 30 days of the Telephone Company request.

When this report is not available to the Telephone Company until after billing, it shall be used by the Telephone Company to calculate and post a credit to the IXC's account. The credit shall be posted to the IXC's account within 30 days of receipt of the report. The credit shall be calculated by multiplying the number of access minutes of use, for which a credit is determined to be applicable, times the difference between the terminating and originating Carrier Common Line charges in effect when the calls were completed.

(E) The originating Premium Access per minute charge(s) apply to:

- all originating access minutes of use;
 - less those originating access minutes of use associated with FGA Access Services where the off-hook supervisory signaling is forwarded by the IXC's equipment when the called party answers;
 - less all originating access minutes of use associated with calls placed to 700, 800 and 900 numbers;
 - less those originating access minutes of use associated with Wireless Switching Centers (WSCs);
 - plus all originating access minutes of use associated with calls placed to 700, 800 series and 900 numbers for which the IXC furnishes for each month a report of either the number of calls or minutes or a report of the percent of calls or minutes that terminate in a Switched Access Service that is assessed Carrier Common Line charges, and for which a corresponding reduction in the number of terminating access minutes of use has been made as set forth in (D) preceding.
